

Extend your Lifestyle®
Aluxor VS

create shade with privacy

The Aluxor VS is a vertical screen awning ideal for privacy and shade. Solar rays are blocked before they reach the windows, so providing the most effective solution to reducing the internal room temperature from the sun.

The elegant and discreet cassette is constructed from high quality extruded aluminium with the cassette size being 113mm high x 126mm deep. A single unit can be up to 5 metres wide with a drop of 3 metres. It is available as a wall mount or ceiling mount installation.

The vertical screen is available with either extruded aluminium guide channels or tensioned stainless steel side cables.

The Aluxor VS is stylish, innovative and highly reliable. It is available in standard colours of white, silver, cream, black, beige and dark grey or in a selection of custom powdercoat colours and a variety of fabrics to complement the awning. The awning can be operated manually by a crank handle and gear operation, or can be motorised with optional sun, wind and timer systems.

Aluxor Awnings is a leading manufacturer of German precision-engineered awnings, operating in Australia for over 20 years. Our awnings are built to last.

AWNING SYSTEMS

All operating components are designed and manufactured in Germany and certified to the European CE standard.

Extruded aluminium profiles provide solid, stable and long lasting quality that will not rust or vibrate in harsh conditions.

Construction hardware is made of marine grade 316 stainless steel.

The fully enclosed cassette provides optimal protection for the fabric and operating mechanism when retracted.

Powdercoat profiles pre-treated by chromate conversion prior to coating to ensure longevity of finish.

Aluminium brackets interchangeable for top and wall fix installations.
